KYRA MEDICAL

MADE IN THE USA

KYRA® Prone Head Positioners

Innovative Solutions. Maximum Protection.

KYRA's range of prone head positioners are designed to support a variety of procedural needs and clinical preferences—from standalone, disposable supports to innovative, adjustable helmet/mirror systems.

- Choice of reusable or fully disposable options for procedural flexibility.
- Pressure-reducing cosmetic foam for patient support and comfort.
- Molded designs provide optimal pressure distribution and patient visualization.
- Compatible with standard OR and imaging tables and Jackson-style tables (use with KYRA9050 Connect Head Plate).

Prone Head Support System

Innovative roll-over safety rim protects patients face during transfer.

ProneAlone™ Head Support

Fully disposable option with mirror for patient monitoring.

Prone Head Support Solutions

Prone Head Support System
KYRA9071K

- Unique molded design with safety rim; no sharp edges, improved protection during transfer.
- Ergonomic, easy-turn knobs alter height to achieve a neutral neckline.
- Evenly distributes pressure across the patient's face to reduce the risk of pressure-related injury.
- Use with KYRA9080 Prone Face Cushion, Adult or KYRA9083 Prone Face Cushion, Child; 10 per pack.

Prone Head Support System, Chinless
KYRA9072K

Same positioning benefits of the Prone Head Support System plus:

- Chin-free profile preserves intubation access.
- Saves time by eliminating the need to remove and reinsert the airway during positioning.
- Improves patient safety by reducing contamination risk and avoiding unnecessary airway trauma.
- Use with KYRA9081 Prone Face Cushion, Chinless, 10 per pack.

ProneAlone™ Head Support
KYRA9082 - 8 per pack

- All-in-one standalone head support solution.
- Molded design for improved support, stability and alignment.
- Fully disposable, including mirror, for improved infection control.
- Mirror included for facial monitoring.

Foam Head Block
KYRA9022 - 6 per pack

- Provides support of the head and neck during prone positioning for 2 hours or less.
- Disposable for improved infection control.
- Slotted design to accommodate ventilation tubing.
